Total Registrations (Combined State and National Donate Life Registry): 145,455,348 Overall DDS: 58%

As of December 31, 2017

*DATA METRIC DEFINITIONS

Donor Designation Share (DDS)

The Donor Designation Share seeks to measure the percentage of the adult population registered as donors by dividing the number of individuals in the donor registry of a state by the adult population, as measured by the most recent census or census estimate.

Donor Designation Rate (DDR)

The Donor Designation Rate seeks to measure the percentage of individuals during a quarter who say "Yes" to donation when given the opportunity during a motor vehicle department transaction.

Eligible Designated Donor Rate (EDDR)

The Eligible Designated Donor Rate is the percentage of eligible deaths (as defined by the UNOS eligible death definition) who are registered donors. The EDDR goes beyond a simple Donor Designation Share (DDS) in the general adult population. The EDDR seeks to measure the rate of donor registration among those who are in the population of likely donors.

Donors Authorized by the Registry: Designated Eye Donor Share (DED), Designated Tissue Donor Share (DTD) and Designated Organ Donor Share (DOD)

DED, DTD and DOD shares measure the percentage of a state's donors that were authorized through donor registries.
